# BE PART OF SHAPING THE NARRATIVE OF TOMORROW'S SUPERYACHT INDUSTRY

**Sponsorship opportunities are now available for the annual Superyacht UK Technical Seminar.**

We are pleased to announce that the annual Superyacht UK Technical Seminar is set to return to London on Tuesday 25 March 2025.

Taking place at The Union Jack Club, London, the seminar, now in its 14th year, is well-established in the Superyacht calendar. Each year it welcomes international industry professionals from within the Superyacht world who will come together to discuss sector specific topics.

The success of the seminar hinges not just on the knowledge shared from its prestigious line up of speakers, but on the strength of the partnerships that underpin it. Sponsors play a pivotal role in providing the foundation upon which innovation can flourish and connections can be forged. Your sponsorship will not only spotlight your brand among the elite of the maritime world but also demonstrate your commitment to driving the industry forward.

Please contact Michael Beattie at [mbeattie@britishmarine.co.uk](mailto:mbeattie@britishmarine.co.uk) for further information and sponsorship opportunities.

# WHAT THE DELEGATES HAD TO SAY

"The seminar is always a thought provoking and interesting day. It's great that so many members of the Superyacht Industry are based in the UK. The standout session for me was the presentation by Vittorio Boccolini on new developments and alternative fuels, plus I was delighted to be asked to join the keynote panel and participate in the discussion around Lithium Ion with other industry leaders"

**Mike Wimbridge, Managing Director, Pantaenius.**

"It's been a great turnout. I think more questions than answers have been provided today and the need to look at alternative fuels, recognising the challenge and knowing that they are going to be super difficult to deliver in the time scale. One presentation, in particular, that had a real impact on me showed the graphic representation of how a 68-meter yacht would have the design issues for alternative fuels."

**Jeff Houlgrave, Marina Projects.**

"We have thoroughly enjoyed today. The keynote speakers, in particular Vittorio Boccolini, were engaging and well worth the trip up. Thanks again to Superyacht UK and British Marine for another wonderfully run event."

**Amilia Strath and Georgia Gates, GRP Boat Repairs.**
